

Refrigerants, Naturally!

Do you work in the Refrigeration, Air Conditioning and Heat Pump (RACHP) sector or use equipment from these sectors in your business? Do you want to minimize the climate impact of your business?
With natural refrigerants, you can truly make a difference!

JOIN US!

The Refrigerants, Naturally! Association paves the way for climate neutral and sustainable heating and cooling. Membership is open to all companies, organisations, associations, institutions or individuals seeking to support our cause.

MEMBER BENEFITS

Our member network of front-running RACHP innovators actively contributes by:

- joint market development and promotion of RACHP products with natural refrigerants;
- sharing information on collaboration opportunities and initiating projects;
- common advocacy in support of natural refrigerants influencing national and regional regulation and standardisation;
- exchanging on upcoming (legal) requirements;
- sharing tools and best practices to facilitate market uptake;
- jointly presenting at leading industry events;
- providing or getting access to scientific input on advancing natural refrigerants and their use.

René van Gerwen,
board knvkc & young cool

"We want to learn from others and share our achievements with others. Joining forces is essential for accelerating the global uptake of natural refrigerants to combat climate change!"

WHY NATURAL REFRIGERANTS?

Using natural refrigerants is the first step to truly carbon neutral and sustainable solutions in refrigeration, air conditioning and heat pumps:

- Minimum impact on climate, the ozone layer and the environment;
- Less expensive and more predictable life cycle costs than comparable synthetic refrigerants;
- Stable availability and usability in line with any existing or future environmental legislation.

WHO WE ARE

- Refrigerants Naturally is a recognized non-profit association under German law: all incomes are spent on our common purpose! Leading companies and NGO's in the Refrigeration, Air Conditioning and Heat Pump (RACHP) sector form the board of the global initiative.
- The first campaign was started in 2004 by Unilever, CocaCola, McDonalds, supported by Greenpeace and UN Environment, followed by PepsiCo, Carlsberg, IKEA and Red Bull. 100% natural refrigerants in new point of sale standalone commercial refrigeration systems were achieved in 2017.
- The current, second campaign is aiming even bigger: to transform the RACHP sector towards future-proof zero-climate solutions for all heating and cooling demands.

MORE INFO & CONTACT

Find more information about membership conditions, natural refrigerants and our activities on our website: www.refrigerantsnaturally.com

Dietram Oppelt,
managing director HEAT GmbH

"There is no time to loose for the transition to natural refrigerants: They allow comfortable living through heating and cooling. And most importantly, they limit climate and environmental damage.
